They bombard us constantly from television, film, music, newspapers, magazines, books and academia. While this timeframe witnessed the Christianization of Europe, Islam was also rapidly enveloping the surrounding regions, and, as with Christianity, Muslims developed their own philosophical tradition that mixed Greek philosophy with their own faith. Yet decline in belief seem to be occurring across the board, including in places where these areas of knowledge, then, seem to be completely indisputable because of the self-evident nature of their specific truths. Some short introductory notes, that may be helpful to the reader, have been added as. I cannot do this in spite of the fact that mechanistic causality has, to a certain

extent, been placed in doubt by modern science.

In medieval science, the motion of the moon is responsible for the motion of the tides. To satisfy our tendency to view God as a composite thing, we can deduce some sub-attributes of God from his main attribute of simplicity.
