Hopelessness, loss of meaning, and existential distress among such survivors can be differentiated from depression and is recognizable in palliative care settings. This short read is broken up in two parts.

Iamalwaysbitchy.Basedonaqualitativemeta-analysisofthestudies,inve

It helps me to know that I am not the only one who needs to separate the sadness from the wonderful person that I got to love for awhile. At this stage, the patient's focus is on the physical limitations imposed by the disease, associating it to pain, fear of being dependent on other people, and fear of death 4when the patient is an elderly person.
